

Element Filters

TOP LOAD ELEMENT FILTERS

The Top Load element filter is an effective filter for small space utilization. The Top Load housing is constructed of a strong thermoplastic material which provides a 50 psi rated working pressure for the unit. The durable screw on lid is designed for quick and easy access to the element for cleaning and general maintenance.

- 1 1/2" Slip Connections with internal bypass valve.
- Standard 100% Polyester fabric, 30 micron cartridge.
- Built In, automatic air bleed system.
- All Nitrile rubber seals.
- Special screw on lid for easy access to the filter.
